**INTRODUCTION TO THE CANINE  
PATIENT**

Created by

Laurie Edge-Hughes, BScPT, MAnimSt (Animal Physio.),  
CAFCI, CCRT

This new program is an INDEPENDENT STUDY  
COURSE. It consists of a 195 page manual with topics  
including:

Introduction to the Canine Patient

Anatomy of the Canine Forelimb

Anatomy of the Canine Hindlimb

Anatomy of the Canine Spine

Orthopaedic Conditions of the Dog

Neurologic Conditions of the Dog

Gait Patterns in Dogs

Behaviour and Handling of the Canine Patient

Occupational Health Considerations for Working with Animals

Common Canine Medications & Nutraceuticals

Legal Issues, Politics, & Practice

This course is open to anyone with an interest in animals. It  
includes a multiple choice exam, designed to assist you with your  
learning of this material, and upon successful completion of the  
exam (with a grade of 85% or better) you will receive a certification  
of completion.

The course material will serve as the prerequisite for physical  
therapists wanting to take the Introduction to Canine Rehabilitation  
Course.

All material can be learned from the comfort of your own home in  
fuzzy bathroom slippers and with rollers in your hair!
